

Everything You Need. Right Where You Need it.

CONTAINERIZED COMPRESSOR ROOMS

NEW Airmatic Containerized Solutions

Seize Control: Save time and money by eliminating expansions fees, building permits & costly overruns.

Climate Resistant: Rugged enclosure protects from the worst weather conditions, from -40°F to 130°F.

Facility Footprint Optimization: Save valuable floorspace in your building.

Quiet: 1.5" sound dampening insulation absorbs compressor noise, reducing noise levels around the exterior of the container.

Built-in America: Proudly designed with precision & quality craftsmanship in the USA.

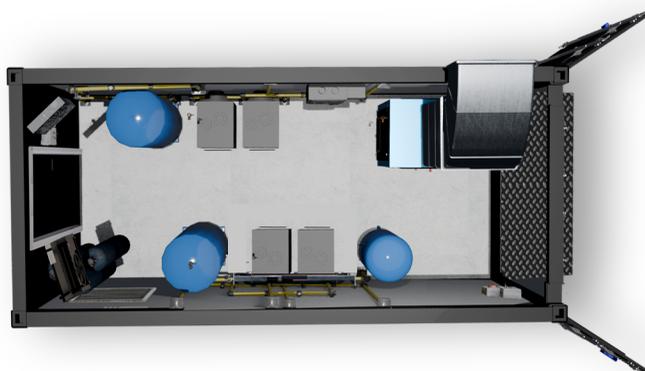

Versatility: Great for long & short-term solutions, designed to easily be transported & moved.

Easy Installation: Only one electrical, discharge air & condensate line required.

Accessible and Flexible: Easy to service equipment and customizable to meet your needs.

Revolutionary
Containerized Systems

Key Capabilities & Options

Airmatic's containerized units have custom capabilities which offer a wide range of compressed air, nitrogen, oxygen, and vacuum options:

Compressed Air:

- Oil-Free and Oil-Flooded
- 5 HP to 600 HP
- 18 SCFM to 2500 SCFM
- 30 PSIG to 600 PSIG

Nitrogen Generation:

- Up to 1,700 SCFM
- Up to 6000 PSIG
- Up to 99.999% Purity

Oxygen Generation:

- Up to 7,000 SCFH
- Up to 6000 PSIG
- Up to 95% Purity

Vacuum:

- 10 HP to 125 HP
- Up to 28 inHg
- Up to 3500 SCFM

Airmatic's units are equipped with top-tier air and gas treatment components, storage tanks, and piping systems:

Treatment:

- Refrigerated Dryers
- Desiccant Dryers
- Line Filters
- Mist Eliminators
- Oil Water Separators
- Condensate Drains

Storage:

- Wet and Dry Tanks
- Vertical or Horizontal Configuration
- Sizes up to 400 gallons (internal) and 2500 gallons (external)

Piping:

- Compressed Air - Blue Aluminum
- Nitrogen - Green Aluminum
- Vacuum - Grey Aluminum
- Inert Gas - Black Aluminum
- Stainless Steel or Copper Options
